

MEMORANDUM

TO: Marketing Leadership, Finance, Product Development
FROM: Mike Adisa, VP Marketing Europe
DATE: February 8, 2025
RE: Product Launch Investment – France Market (MKTG-FR-PR)

Strategic Directive

MKTG-FR-PR is authorized to exceed FY2025 baseline budget to support the accelerated launch of our next-generation pharmaceutical product line in European markets, with France as the lead market.

Business Rationale

Market analysis indicates a 6-month window to establish market leadership before competitors enter the space. Delaying the launch to stay within budget would result in:

- Loss of first-mover advantage estimated at €15M in year-one revenue
- Increased customer acquisition costs in subsequent quarters
- Potential market share erosion to competitor products

The investment is front-loaded in Q1-Q2 to secure launch positioning.

Budget Authorization

Baseline Budget (FY2025): \$550,000
Approved Supplemental: \$50,000 (9.1% increase)
Total Authorized Spend: \$600,000

Supplemental allocation breakdown:

- Enhanced digital advertising campaigns (Google, Meta, LinkedIn)
- Premium PR agency engagement (Publicis, Havas)
- Product launch event and materials
- Market research and competitive intelligence (BVA Group)
- Accelerated content production and localization

Success Metrics

- Product awareness: 40% target audience reach by Q3
- Lead generation: 2,500 qualified leads by Q4
- Market share: 12% category penetration by year-end

Finance will track ROI against these metrics. If Q2 performance falls below 70% of targets, spending will be curtailed.

Governance

Weekly spend reports to Marketing Finance. Monthly business reviews with Executive Committee. All agency contracts require dual approval (Marketing + Finance).

Approved by: Executive Committee

Meeting Date: February 5, 2025
