

MEMORANDUM

TO: All Department Heads, Finance Leadership

FROM: Shirley Ross, Chief Human Resources Officer

DATE: March 15, 2025

RE: India Talent Acquisition Initiative - Budget Supplemental Approval

Executive Summary

Effective immediately, HR-IN-RC (Human Resources - Recruitment - India) is authorized to exceed baseline FY2025 budget allocations to support accelerated hiring across our India operations.

Strategic Context

Our Q1 2025 business review identified India as a critical growth market for R&D and clinical operations expansion. Current headcount constraints are limiting our ability to execute on committed timelines for three major programs:

- Biotechnology research expansion (RD-CA-01 collaboration with India-based partners)
- Clinical trial capacity increase for APAC markets
- Digital transformation initiatives requiring specialized technical talent

Budget Impact

Baseline Budget (FY2025): \$800,000

Approved Supplemental: \$75,000 (9.4% increase)

Total Authorized Spend: \$875,000

This supplemental funding will be allocated to:

- Premium recruitment platform subscriptions (LinkedIn Recruiter, Naukri Premium)
- Specialized headhunter services for hard-to-fill technical roles
- Enhanced candidate assessment tools and background verification
- Campus recruitment program expansion

Execution Timeline

Q2 2025: Focus on senior technical roles and research scientists

Q3 2025: Clinical operations staff and project managers

Q4 2025: Administrative support and operational roles

Financial Governance

Monthly variance reports will be submitted to the CFO office. Any additional funding beyond the approved supplemental will require executive committee approval.

The formal budget amendment for FY2026 will incorporate these increases into the baseline allocation.

Approved by: Executive Committee

Meeting Date: March 12, 2025
